DETAILED ACTION

This is in response to the amendment filed on September 22nd 2008.

Status of Claims

Claims 1, 2-6 and 10-13 are allowable.

Claims 7-9 are currently rejected under 35 U.S.C. 101.

Response to Arguments

1. Applicant's arguments have been fully considered and are persuasive. Specifically, the argument that Hanzlik and Suzuki do not disclose using the same group association for different connections is persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of 35 U.S.C. 101.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to an apparatus which

Art Unit: 2442

could be considered a machine under 101 however the apparatus defined by the claim consists entire of logic. There are no hardware elements recited that would render the claim patentable as statutory subject matter. Rather the term apparatus is a misnomer because the claim consists entire of logic which in this case seems to be computer software. Software per se is not patentable subject matter. Please see MPEP 2106.01 and the recent Bilski decision.

Claims 8-9 do not add any limitations that would render the claims patentable. They are rejected since they depend from a rejected claim.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the independent claims now recite "for a second communication between a second subset of members, securing route information using the same group security association used for the first communication between the first subset of members". This feature overcomes the cited prior art and cannot be found in a subsequent search for prior art. The idea of a scalable virtual private network is not new however the step of doing so by reusing security keys is novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
